Irrigation 11,730 acres; Stockwatering Varies; Domestic 200,000;

Other (specify) _____

E. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES _____ NO _____
Describe any water conservation efforts you have initiated: _____

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ____ NO X.
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ____ NO ____.

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES ____ NO X.
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year ____ (AF/MG) Year ____ (AF/MG) Year ____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES ____ NO ____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

File: 0541.41

State Water Resources Control Board
Division of Water Rights
Post Office Box 2000
Sacramento, California 95810

Gentlemen:

In compliance with California's Water Use Inventory Law, the Coachella Valley Water District is filing Statements of Diversion and Use of flows from twelve watershed streams.

In 1918 the Coachella Valley Water District was formed for the purpose of obtaining and protecting the natural waters draining into the Coachella Valley. During the intervening years this District has performed the management practices required to permit the maximum possible amount of stormwater runoff to infiltrate into the underground. These waters are recovered by well pumpage. There is no unappropriated water existing.

The filing of these Statements of Water Diversion and Use serves to notify that the Coachella Valley Water District has historical water rights in these and lesser streams and that there is no available water for new applicants.

If you have any questions please contact Warren Norried, Water Resources Engineer.

Yours very truly,

Tom Levy
General Manager-Chief Engineer

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RIGHTS BOARD

STATEMENT OF WATER DIVERSION AND USE

83219

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water: Coachella Valley County Water District
Address: P. O. Box 1058, Coachella, California 92236
- B. Name of body of water at point of diversion: CHINO CREEK near Palm Springs
Tributary to: Whitewater River
- C. Place of diversion: $\frac{1}{4}$ Section 33, Township 35, Range 3E, SB 2224,
Riverside County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks. The stream spreads and infiltrates over portions of approximately 2 or 3 sections, which are reserved and managed for this function
- D. Name of works: Whitewater River Spreading Area
- E. Capacity of diversion works: _____ cubic feet per second
Capacity of storage reservoir: _____ gallons per minute
State quantity of water ^{spread} ~~diverted~~ each month in ~~gallons~~ ^{acre-feet} _____
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
| 1966 | : | : | : | : | : | : | : | : | : | : | : | : | 2834* |
- *computed
If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. Water extracted by wells to supply 58,000 people; also irrigates approximately 10,000 farm acres.
- Maximum annual water use in recent years: _____ gallons
Minimum annual water use in recent years: _____ gallons
Type of diversion facility: gravity _____, pump _____
Method of measurement: weir _____, flume _____, electric power meter _____, water meter _____, estimate _____
- F. Purpose of use (what water is being used for) 23,200 Ac. Ft. for Domestic Use
69,000 Ac. Ft. for Agri. Use
- G. General description or location of place of use (use sketch of section grid on reverse side if you desire) _____
Coachella Valley, within District Service Area.
- H. Year of first use as nearly as known 1918
- I. Name of person filing statement Lowell O. Weeks
Position Gen. Manager-Chief Engineer Organization Coachella Valley County Water District
Address P. O. Box 1058, Coachella, California 92236

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed September 11, 1967

Signature Lowell O. Weeks
